

## GRAPE ICE

### Ingredient:

Mix of seedless grapes

### Directions:

- 1) Put a mix of grapes on skewers, leaving room between the grapes.
- 2) Put the skewers on a flat surface in the freezer, again making sure the grapes aren't touching.
- 3) Freeze for at least 4 hours.
- 4) Remove from the freezer and let sit for a few minutes, so that the grapes will release slightly from the skewers.
- 5) Pull the grapes from the skewers.

Use the frozen grapes in wine glasses, to keep drinks (such as sangria) cool without diluting them. Keep extra frozen grapes in a freezer bag in the freezer, and try to use them within one day of freezing them.
